

Using training programs

Training programs allow trainers to organize which training modules students should complete.

There are two types of training programs:

- **Any order** – Participants can complete the selected modules in any order.
- **Lesson plan** – Participants must complete the modules in the order defined by the trainer.

Training programs are managed through the **Training Workx portal**.

You can access the portal at:

- Logistic Workx: portal.logisticworkx.com
 - Cleaning Workx: portal.cleaningworkx.com
-

Creating a training program

1. Log in to the **Training Workx portal**.
2. Go to **Training** → **Trainings**.
3. Click **+ Training program**.
4. Enter a name for the training program.
5. Choose the desired **Training form**:
6. **Any order** – Participants can complete the selected modules in any order.
7. **Lesson plan** – Participants must complete the modules in the predefined order.
8. Add the modules you want to include.
9. Save the training program.

The first screenshot shows the Cleaning Workx dashboard. The 'Training' menu is highlighted with a red box and the number 1. The 'Trainings' sub-menu is highlighted with a red box and the number 2. The '+ Training program' button is highlighted with a red box and the number 3.

The second screenshot shows the 'Create training program' form. The 'Any order' and 'Lesson plan' options are circled in red.

Training form

- Any order**
Participant chooses the order themselves.
- Lesson plan**
Fixed order with steps and tests.

Assigning a training program

Once a training program has been created, it can be assigned to individual students.

1. Go to **Training** → **Students**.
2. Find the student and click **View modules**.
3. Click **Manage modules**.
4. In the top-right corner, use the **Training program** dropdown to select the training program you created.

5. Save the changes.

The selected training program is now assigned to the student.

Using training programs in VR

When students start the VR training, they will see the modules from their assigned training program.

- If the training program is **Any order**, students can complete the modules in any order.
- If the training program is a **Lesson plan**, students must complete the modules in the predefined order.
